| Location | 100% based at SESAR Deployment Alliance (SDA) AISBL Headquarters in Brussels, Belgium. |
| Accountable to | SESAR Deployment Programme (SDP) Execution Manager |
| Accountable for | Monitoring and stakeholders’ support provision regarding the implementation of the Pilot Common Project (EU) No 716/2014 |
| Scope | The Pilot Common Project (PCP), any subsequent revision and any additional Common Projects (CPs) as adopted by the European Commission, the SESAR Deployment Programme, the Framework Partnership Agreement (FPA) and the associated Specific Grant Agreements (SGAs). |
| Accountabilities | • To synchronise and coordinate the execution of the implementation projects awarded within the SESAR Deployment FPA, against the Deployment Programme and the SGA;  
• To monitor the execution of projects through the verification, qualification and validation of the data provided by Project Managers describing the status of implementation, allowing the identification of possible discrepancies, risk management and find suitable mitigation measures;  
• To report any recommendations and/or alerts resulting from the coordination activities;  
• To contribute in the elaboration of the Action Status Report, Execution Progress Report and the SESAR Deployment Programme;  
• To develop and maintain positive and constructive relationships with all Points of Contacts from the Implementing Partners;  
• To ensure constructive cooperation and synergies with interfaces experts working on the same or similar subjects;  
• To support the other SESAR Deployment Manager’s Directorate and Units regarding the SDP planning, execution, monitoring and reporting objectives in order to demonstrate the benefits for the European ATM Network. |
| Competencies | Essential:  
• Background career experience in Air Traffic Management (ATM);  
• Good understanding of deployment initiatives in the field of ATM in an international context, in particular the SESAR Project;  
• Previous experience as project manager or main contributor of multi-stakeholder’s projects;  
• Educational achievement and qualifications commensurate with the |
technical content of the role;
  • A good knowledge of written and oral English;
  • Proactivity, openness, flexibility and personal autonomy.

Desirable:
  • Conversant with the European Sky Legislation;
  • Familiarity with the European Commission (EC) and related agencies;
  • Experience gained in a multicultural and multilingual context.
  • Good computer skills
